

# Universal bath chamber

The universal bath chamber allows the use of object holders (26x76), NUNC dishes, Falcon dishes (up to  $\varnothing 60\text{mm}$ ) and the LN bath chamber inserts. Additionally the chamber can be used with the LN bridge 500, the LN bath chamber manipulator system and the original microscope tables of the microscope suppliers. The design of the chamber allows the direct attachment of the reference electrode and in/outflow using magnets on the steel surfaces.

Universal bath chamber

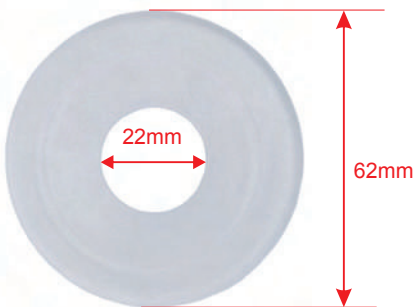

Contain:
